PROJECTS

21sh

A minimal shell when I learned how to parse command line, handle i/o redirections, implement a set of shell builtins, execute binaries, handle pipe sequence commands.

Ft_ls

Recode of the unix command `ls`, I got to know how to list directories retrieve inodes stats, depending on the passed options.

Ft_printf

Re-code of the C function `printf` (stdio.h/printf). This includes reading data raw data and interpreting it to a specific type, especially floating point numbers.

Inception_of_things

An introduction to vagrant and k3s, I worked on deploying `Gitlab-ce` on a Kubernetes cluster.

SKILLS

- JavaScript, C
- ReactJs, NodeJs
- GraphQL, RESTapi
- Devops

INTERSETS

- Linux administration
- System Programming
- Algorithms

SUMMARY

I am a passionate programmer. I love building software, mostly the ones that include systems programming, low level Languages, or back-end Development.

EDUCATION

DIGITAL ARCHITECT

1337, Khouribga | 2019 - present

BACHELOR IN COMPUTER SCIENCE

University Mohammed First, Oujda | 2014 - 2018

WORK EXPERIENCE

WEB DEVELOPER

Green market / Souk | 1337 labs - Summer 2020

A market for agriculture related product. I worked on a dashboard to manage product and customers.

WEB DEVELOPER

Wiqaytna | 1337 labs - Summer 2020

Moroccan application for COVID-19 tracking. I worked on a dashboard, to manage and notify mobile app users, see various statistics about users anonymous movement in cities.
